

Islam Gender And Democracy In Comparative Perspective By Jocelyne Cesari

"Pressestimmen '[T]he book succeeds in problematizing the simplistic association of women's equality with secularism. Its essays present a wide swath of experiences which are diverse enough to demonstrate why the targeted bifurcation is too simplistic (as it is in Malaysia, Indonesia, Bangladesh, and Senegal) without ignoring contexts in which it sometimes appears applicable (as it does to varying extents in Iran, India, Morocco, and Tunisia) It would work well as a supplement in undergraduate or graduate sociology, anthropology, or political science courses that discuss religion and gender, although instructors should select chapters judiciously to ensure representation of the breadth of perspectives from its case studies that is necessary to problematize its target simplifications.'--Rachel Jonker, *Reading Religion*
