This book presents a comprehensive evaluation of the likely economic impact upon the UK economy arising from Brexit. It seeks to assess both the methods adopted, and conclusions reached, by the existing economic studies, and supplements this by providing additional evidence to assist the reader in forming their own assessment of the relative merits of the different approaches. It additionally outlines the options available to policy makers for the formation of an economic strategy capable of adapting the economy to the challenges and opportunities presented by Brexit. Finally, it outlines and comments upon the range of alternative models of future trading relationships that are available to the UK, both in relation to the EU and the rest of the world.

Philip B. Whyman is Professor of Economics and Director of the Lancashire Institute for Economic and Business Research (LIEBR), at the Lancashire Business School, University of Central Lancashire, UK. He is author of 11 research monographs, editor of 5 books and author of 50 articles in learned journals.

Alina I. Petrescu is Research Fellow in Labour Economics at the University of Central Lancashire, UK. As part of a research team led by Professor Philip B. Whyman, Alina finds fascination in studying the world of work, bringing to light new insights into flexible practices, migration and organisational performance. Her work projects are listed at www.alinapetrescu.com.

Cost Benefit Analysis CBA Economics Online
June 6th, 2020 - Cost benefit analysis (CBA) is a method of appraising large scale investment projects often involving public spending such as rail links, motorways and airports. The process involves estimating all the perceived private and external costs and benefits of alternative spending options such as alternative sites for a new airport and then selecting the option with the...
The Economics of Brexit: A Cost Benefit Analysis of the UK’s Economic Relationship with the EU by Philip B. Whyman, Alina I. Petrescu

Economic Effects of Brexit

June 7th, 2020 - The economic effects of Brexit were a major area of debate during the referendum on UK membership of the European Union. After the leave vote, there is a broad consensus among economists that Brexit will likely reduce the real per capita income level in the UK. Supporters for remaining in the EU, including the UK Treasury, argue that being in the EU has a strong positive effect on trade.

Brexit Costs Close to Matching Britain’s Total EU

June 8th, 2020 - The stunning cost of the UK’s long and drawn-out divorce with the European Union has been laid bare by a new analysis from Bloomberg Economics. It found that real GDP losses due to Brexit stood.
